Caloocan City, Philippines

FullStack Developer (Typescript | Node.js | React.js | PHP | VB.net)

EXPERIENCE

Full Stack Developer

Upward Management Insurance Services Inc. – Quezon City

Sept 2023 – Oct 2025

- Served as the solo developer responsible for modernizing a legacy VB.NET + SQL desktop system into a full-stack web application using React (TypeScript), Node.js (TypeScript), and MySQL, deployed via Hostinger.
- Successfully delivered a production-ready accounting and claims management system within one year, enabling the company to transition from a desktop-based workflow to a centralized web platform.
- Reverse-engineered legacy code and independently rebuilt system modules despite limited documentation, continuously improving the platform with new features, system maintenance, and performance enhancements.

Internship Software Developer

Exxel Prime Int'l Trading Inc. – Caloocan City

Mar 2023 – Jun 2023 (3 months)

- Developed and improved an internal inventory and reporting system using Delphi, JavaScript, CSS, Jasper Reports, and SQL to manage product records, supplier information, and company transactions.
- Implemented automated reporting through Jasper Reports, enabling faster generation of operational reports and improving visibility into inventory and business data.
- Optimized SQL queries and system performance, ensuring reliable data processing and improving the efficiency of inventory tracking and reporting workflows.

Internship Software Developer

Taters Enterprises, Inc. – Makati City

Aug 2022 – Dec 2022 (4 months)

- Developed and maintained the “I Love Taters” e-commerce web application using ReactJS, TypeScript, Redux, and PHP (CodeIgniter); designed web pages, built APIs, and collaborated with senior developers during agile development cycles.
- Contributed to the delivery of a fully functional online ordering platform, improving the digital shopping experience and supporting the company’s online sales operations.
- Ensured high-quality code implementation and UI consistency, participating in daily and weekly development meetings and assisting senior developers in resolving technical issues and improving features.

PROJECTS

Accounting & Claims Management System

Upward Management Insurance Services Inc. | React (TypeScript), Node.js (TypeScript), MySQL, Hostinger, VB.NET

- Led the full-stack redevelopment of a legacy VB.NET desktop system into a modern web application, handling frontend, backend, and database development independently.
- Successfully delivered a production-ready accounting and claims management platform within one year, enabling centralized access to financial and claims data across the company.
- Reverse-engineered legacy code and rebuilt system modules with modern technologies, improving system maintainability, scalability, and long-term operational efficiency.

Company Inventory & Reporting System

Exxel Prime Int'l Trading Inc. | Delphi, JavaScript, CSS, Jasper Reports, SQL

- Developed an internal inventory and reporting system to manage product records, orders, and supplier data while implementing reporting features using Jasper Reports.
- Automated business reporting processes, allowing managers to generate real-time operational and inventory reports more efficiently.
- Optimized SQL queries and database operations, improving system reliability and data processing for daily business transactions.

I Love Taters – E-commerce Web Application

Taters Enterprises, Inc. | ReactJS, TypeScript, Redux, PHP (CodeIgniter)

- Developed a full-stack e-commerce web application by designing responsive UI pages, building REST APIs, and collaborating with senior developers using ReactJS, TypeScript, Redux, and PHP (CodeIgniter).
- Contributed to launching a fully functional online ordering platform, enabling customers to browse products and place orders through a modern web interface.
- Improved code quality and development workflow by participating in regular development meetings, assisting in debugging tasks, and ensuring consistent implementation of application features.

TECH SKILLS

Technologies with Professional Experience

Programming Languages: **TypeScript | JavaScript | PHP | SQL | VB.NET | Delphi**

Frontend Development: **React.js | Redux | HTML | CSS | Responsive Design**

Backend Development: **Node.js | CodeIgniter (PHP Framework) | REST API Development | Prisma ORM | DataMapper ORM**

Database: **MySQL, SQL Query Optimization, Database Design, MySQL Workbench**

DevOps & Deployment: **Docker | Linux Ubuntu Server | VPS Hostinger Deployment | Linux Server Management**

Version Control & Collaboration: **Git | GitHub**

Reporting & Tools: **Jasper Reports | SAP Crystal Reports**

Additional Technologies (Familiar / Learning): React Native | Flutter | ASP.NET | Java Spring | GraphQL | MongoDB

EDUCATION

- **Bachelor of Science in Information Technology Major in information Management**
Bestlink College of the Philippines
2019 – 2023
- **Information Communication Technology**
Senior High School St. Claire College of Caloocan City
2017 – 2019
- **High School Benigno Aquino Jr. High School**
2013 – 2017
- **Elementary Gabriela Silang Elementary School**
2006 – 2013
